## **6. ABOUT US**

We are a team of developers, designers, project managers, and marketers working continuously to exceed clients and users expectations. Our vision is to build a standard software with illustration features that helps kids explore and help kids visualize the knowledge.

### **Values**

Our core value is striving for excellence. Our focus is providing an app that help kids explore their creativity and place images to words. We pride ourselves on creating a feature that makes imagery accessible for children and adult use. We position ourselves as an extension of our team members, working with exceptional team members that helped brought this project to life.

### **Goals and Objectives**

- Build a feature that automatically generates the images needed in a kid's storybook.
- Enable parent's teachers, and book writers to create stories for kids easily.
- Reduce time spent creating a story book
- Allow the user create an online library of collected stories

### **Purpose**

This app is based on the idea of visualizing written text to users. Our purpose is to build an app generating illustrations that's explains written text and enable user understand better of the written contents.
