

ABOUT US

The Story Ai is a text to image app that generates images for written text . It works by using prompts based on your text input to generate illustrations that best suit your written content. This children's book illustrator is an artistic professional app responsible for developing the illustrations for books intended for children ages 2-12.

Vision-To build a standard software that offer a rich set of features widely used for illustrations to help kids visualize knowledge. We always strive to enhance our services, add features, and work backward from consumer requests because we are passionate about offering our users the best services. To build a trusted and simple online children's story maker for users.

Mission- We aim to offer our users a means of generating images from text for children's use to bring about active imagination and visualization. We have a passion for creativity and a dedication to operational excellence. This is why we have created an artistic professional tool for children's book illustrator responsible for developing children's stories with illustrations.

Goals and Objectives

- Build a feature that automatically generates the images needed in a kid's storybook.
- Enable parents, teachers, and book writers to create stories for kids easily.
- Reduce time spent creating a storybook.
- Allow the user create an online library of collected stories.

Values

Our core value is striving for excellence. Our focus is providing an app that help kids explore their creativity and place images to words. We pride ourselves on creating a feature that makes imagery accessible for children's use.

Purpose

This app is based on the idea of visualizing written text to users. Our purpose is to build an app that generate illustrations that explains written text and enable better understanding of written content for kids.

Team

We position ourselves as an extension of our formidable team members consisting of a perfect blend of creative and technical minds to develop and bring to life an excellent product that helps make the life and work of our users, simpler, better and more time efficient.

Team Information:

Team Lead(PM): Papitee
