KIDS ILLUSTRATOR APP UI

The Project 3 is an automated illustrator for children's books. This product is a storybook maker that uses prompt to generate images and illustrations. The more detailed the text is, the better the image content. It works by giving it text input and the app gives you back an image. This illustrator app for imagery is a great tool that helps you create professional quality images for your projects. There's a wide range of benefits that comes with using this app.

USER BENEFITS

- Enhanced Creativity
- Hastens Production Time and Process
- Affordable and Accessible
- To create Promotional Art and Graphics
- Image Representation

1. Enhance Productivity

 Your creativity is enhanced with a wider options of imagery. You're able to select and detect unique pictures that suit your taste as the creator even in the middle of writing. With imagery at your disposal, there's no telling what way it influences your choices and decisions in writing. You can express yourself and create images according to your imaginations simply by inputing a detailed text.

2. Hastens Production Time and Process

 This app hastens the production process and time. You generate imagery in seconds using prompts and it delivers immediately. There's time to produce more books as this app helps cut down time spent on finding the right illustrators and deciding which one to use. That way, lesser time is spent on production and there is more time for more books.

3. Accessible and Affordable

 This app helps you save money and time spent on illustrators. It's easily accessible and can be reached anytime. There's a cut in money spent and professional images are at immediate disposal. You can access the app anywhere from wherever. You can design anywhere, work seamlessly across your devices and keep everything in sync with your images at hand.

4. For Promotional Art and Graphics

This project can also be used to create Promotional art and Graphics. It is able to create images and explain them to your readers.

PITCH

For creative writers like you who uses imagery to enhance characters in children's book, this app will help you pick what suits your writing content better. You'd have the choice to pick from tons of imagery to depicts your imagination and help children get a better understanding of your book's content.
